Cosyntropin Stimulation Test

Patient Instructions: The patient needs to be fasting.

Three blood draws and an injection are required. A baseline Cortisol is drawn. The Cosyntropin is injected. Cortisol levels are drawn 30 and 60 minutes after the injection.

Outpatients: Outpatients should be scheduled through the Treatment and Procedure Center at 785-505-2860.

Order in Cerner Powerchart: "Cosyntropin Stimulation Test Powerplan"
