

How do I look up a test for ordering in Order Entry?

The Laboratory Test Directory is available for reference instead of the Lab Compendium. You may click on a letter to search alphabetically or type part of the test name in the gray box. A list of tests will appear, choose one and click to view to ordering mnemonic and specimen requirements.

How will I know what mnemonic to use in Order Entry?

Yes, the mnemonic will appear in the upper left corner in the "Laboratory Test" box.

If I do not find the test that I need to order, what do I do?

This test may not be orderable. You may call Referrals at x2678 and we will advise you on the next step.

What department can I call about specific test questions?

The "Laboratory Services" link will send you to the MCD Lab Share Point site where you will find extensions to each department within the Lab.

If additional paper work and/or a physician's signature required for testing, do I have access to print the correct form?

Yes, the "Consent Forms and Requisitions" link allows you to print specific paper work that maybe required.
