

Clinical Laboratory Delay Update

Testosterone Free and Total (LAB173)

Updated 7.15.2022

UCHealth South Region Providers:

Please expect delays of up to 20 days in resulting of Testosterone Free and Total (males). This delay is due to reagent shortages at ARUP.

Ordering test code LAB540 (Testosterone Free and Total to Mayo) may result in a shorter turn-around-time.

For any questions about this delay, please contact:

Emily Palser Hellmann, MLS (ASCP), Laboratory Supervisor,

Emily.PalserHellmann@uchealth.org
