

Semen Testing, Update

Laboratory Outreach Client,

Due to an unforeseen analyzer issue, the laboratory is unable to offer semen testing until further notice. We apologize for any inconvenience this may have caused. An update will be provided once our capability to offer these tests is restored.

Until further notice, the following tests are not available:

- Semen Analysis (SEMN), LAB6028
- Sperm Check (SPCK), LAB6029
- Sperm Check, Vas Aspirate (SPVAS), LAB6055

Please reach out to Client Services by calling 503-814-LABS (5227) with any questions. We appreciate your understanding, and we look forward serving you as a valued client with the other tests that we have available. Please visit our test menu at: www.testmenu.com/salemhealthlab for additional information and available tests.

Thank you,
Laboratory Services
