

Surgical Pathology/Bone Marrow Add-ons

AMB & INP Providers

With the Beaker implementation, any testing added on to a previously processed pathology specimen needs to be ordered separately.

UCSF

1. Place an order for: SURGICAL PATHOLOGY/BONE MARROW ADD-ON (ORDERABLE) [LAB4307]
2. For *Request Type* make appropriate selection:
 - **Future/External Sample (UCSF500-specific)** – UCSF500 only
 - **Surgical Add-on** – any additional testing, including UCSF500, for specimens already sent to Pathology
 - **Bone Marrow Add-on** – any additional testing, including UCSF500, for bone marrow specimens t already sent to Pathology

Note: To order UCSF500 ahead of time for future blood, bone marrow or body fluid specimens, please use UCSF500 (BLOOD/BONE MARROW/BODY FLUID) [LAB4371]

If **Surgical Add-on** or **Bone Marrow Add-on** is selected, fields for *Case/Accession ID (copy/paste ID)* and *Test(s) Requested* are required.

Process Instructions: This order is intended for all add-ons for pathology and bone marrow specimens. Please provide exact pathology case ID for faster processing.

For future UCSF500 orders, UCSF500 will be added to pathology specimen after initial review is complete.

Request Type:

Case/Accession ID (copy/paste ID):

Test(s) Requested: ☐ Molecular ☐ FISH ☐ IHC ☐ Other

Comments: [+ Add Comments](#)

[Additional Order Details](#)

Accession ID can be found on initial specimen result report; this detail expedites the review process for additional molecular testing.

SURGICAL PATHOLOGY/BONE MARROW ADD-ON (BCH-OAK) [LAB4105] – Inpatient Order

Once the order is placed, Pathology reviews it and determines if testing can be done. Pathology places necessary lab orders if testing can be done or cancels the Surgical Pathology/Bone Marrow Add-on order if unable to complete requested testing.
