

STEP 1: [Request CRSO Service\(s\)](#)

About the Clinical Research Support Office (CRSO)

The Clinical Research Support Office (CRSO) supports investigators and clinical research study teams in departments, centers, and colleges across campus to conduct clinical research. The office aims to reduce administrative burdens, enhance compliance, and help remove barriers to enable efficiency, internal/external collaboration, cost recovery, and growth of clinical trials at the university. The CRSO is funded by the College of Medicine, UK Healthcare and the Office of the Vice President for Research. It offers support for the OnCore clinical trial management system, billing integrity and coverage analysis, as well as finance and regulatory assistance in partnership with the CCTS.

- Research Discounted Pricing
- Clinical Operations
- Regulatory
- Financial Grants Management
- Participant Recruitment
