Re: **Changes in PSA Methodology at HUP**

Effective today, Oct. 24, 2023, the PSA Total, PSA Screening, PSA Free and PSA Ultra tests will transition from the Beckman to the Roche testing platform. Method comparison between the old and new assays demonstrated good correlation. The following reference and reportable ranges will apply:

Test	Reference ranges (no change)	Reportable ranges
PSA Total & PSA Screening	0-4 ng/mL	0.05- 5000 ng/mL
PSA Free	>25% for PSA Free/PSA Total	0.02-50 ng/mL
PSA Ultra	See interpretive comment for the test	0.01-5000 ng/mL

Please reach out to [Ping Wang](#) or [Theodore Rutledge](#) if you have questions about the change.
