Director of Clinical Chemistry and Core Laboratory
Department of Pathology and Laboratory Medicine

SUBJECT: Immunoassays transition from Roche to Beckman

Effective April 1, 2020, the following immunoassays will transition from the previous Roche platform to a Beckman platform in the Automation Lab for HUP ONLY: CK-MB, Ferritin, Folate, Free PSA, Free T3, Free T4, Total PSA, Total T3, TSH, Vitamin B12. Correlations between the two platforms are in general very good for these assays. Expect to see some minor changes in reference ranges and reportable ranges. Orderables remain the same in Pennchart. Please direct any questions to Beth Lussier at Beth.Lussier@pennmedicine.upenn.edu or Dr. Ping Wang at ping.wang2@pennmedicine.upenn.edu.
