**Re: Hypersensitivity Pneumonitis Panel Assay Testing**

The Immunology Laboratory's current assay for Hypersensitivity testing will be delayed due to backorder issues with the Vendor. Hypersensitivity testing can be sent to ARUP laboratories if clinically time-sensitive. Otherwise, the default plan will be to run the sample once we receive the backordered materials. **Please contact the Immunology Laboratory if you would like to have the test sent out.** Please also note that the ARUP panel does not include Thermoactinomyces Vulgaris #2 and Aspergillus Niger, but does include A. fumigatus #3 (yellow cells).

HUP Panel
Pigeon Serum
Microplysora faeni
S. viridis
Aspergillus fumigatus #1
Thermoactinomyces vulgaris #1
A. flavus
A. fumigatus #2
Aureobasidium Pullulans
Aspergillus fumigatus #6
T. candidus
A. niger
T. vulgaris #2

ARUP Panel
Pigeon Serum
Microplysora faeni
S. viridis
Aspergillus fumigatus #1
Thermoactinomyces vulgaris #1
A. flavus
A. fumigatus #2
Aureobasidium Pullulans
Aspergillus fumigatus #6
T. candidus
A. fumigatus #3

The order codes and tube type (SST) will not change. Reference range is reported as negative.
