Re: **Ordering of Constitutional Cytogenetics Studies**

Constitutional chromosome analysis performed at ARUP can now be ordered directly in PennChart. Constitutional testing includes, but is not limited to, analysis on cord blood, neonatal blood, constitutional adult blood, and on products of conception including stillbirths.

TO ORDER:

- **CHROMOPB:** Chromosome Analysis, Constitutional Peripheral Blood (ARUP 2002289)
- **CHROPOC:** Chromosome Analysis, Products of Conception (ARUP 202288)
- **POCRFX:** Chromosome Analysis, Products of Conception with Reflex to Genomic Microarray (ARUP 2005762)

Each order contains a link to an ARUP pdf form which must be filled out by the provider and submitted with the specimen.

The results will be available in PennChart upon completion of testing. Thank you for your support of Penn's Cytogenetics Laboratory and we hope that this alternative will continue to meet the best needs of your practice and patients as we continue to offer quality testing and service for our cancer patients.
