Philosophy and Purpose

The laboratory's primary objective is to serve the patients. This objective takes precedence over all other considerations. The needs of the pediatric patient differ significantly from those of the adult patient, necessitating a specialized approach to providing clinical laboratory testing for infants and children. Therefore, the goal of these departments is to deliver quality laboratory services to infants and children as quickly as possible by competent medical technologists, technicians, and phlebotomists under medical supervision.

Operation And Organizational Structure

The laboratories consist of the Department of Pathology, Department of Medical Genetics, and the Clinical Laboratories which includes Clinical Chemistry, Hematology, Microbiology, Virology, Transfusion Services, and Phlebotomy.

-
- The clinical laboratories are staffed 24 hours a day, seven days a week for most testing.
- The availability of every test is listed within the individual test listing.
- The medical genetics laboratory is staffed 7:30 am - 4:00 pm Monday through Friday only.

The pathology department has a pathologist available in-house 8:30 am - 5:00 pm Monday through Friday. The pathologist is on-call, for emergencies, at all other times.

Technical services for the pathology laboratory are available from 8:00 am - 5:00 pm Monday through Friday.
