FOR THE MOST UP-TO-DATE TEST INFORMATION, VISIT OUR
ONLINE HANDBOOK AT [HNL.COM/TESTMENU](https://hnl.com/testmenu)

The American Medical Association (AMA) Current Procedural Terminology (CPT) codes published by HNL Lab Medicine are guidelines and are intended for informational purposes only. CPT coding is the exclusive responsibility of the billing entity. HNL Lab Medicine strongly recommends confirmation of CPT codes with third-party payors and/or the AMA. We assume no responsibility for billing errors due to reliance upon CPT codes provided by HNL Lab Medicine. OIG guidelines recommend tests ordered should be reasonable and necessary for the patient, given their clinical condition. Physicians who order medically unnecessary tests for which federal healthcare plan reimbursement is claimed may be subject to penalties. Individual components of profiles or panels may be ordered individually. Physicians who consider reflex testing unnecessary may order an initial test without the reflexed test. Reflex or confirmation tests are performed at an additional charge.

NEW TEST

NEW TEST

Familial Hypercholesterolemia, Genetic Diagnostic Panel (C7000)

Effective Date	Immediately
Order Code	C7000
CPT Code	81479
Includes	Identification of potentially pathogenic variants in all exons and exon/intron boundaries of the APOB, LDLR, LDLRAP1, and PCSK9 genes.
Methodology	Next generation sequencing and copy number variation analysis
Testing Schedule	Monday-Friday
Report Availability	14-28 days
Minimum Volume	3 mL Whole Blood
Container	Lavender top tube, EDTA
Collection	Room temperature preferred, refrigerate if specimen cannot be transported to the lab within 24 hours
Special Instructions	Transport storage: Room temperature preferred, can be refrigerated or on cold packs Do not freeze or expose to extreme temperatures, refrigerate for up to 72 hours if cannot be transported to lab within 24 hours
Reference Range	No potentially pathogenic variants detected
Clinical Utility	Genetic analysis to provide a molecular diagnosis of familial hypercholesterolemia. Recommended for individuals with a personal and/or family history of early onset high cholesterol levels to ensure appropriate treatment and establish recurrence risk for family members.

For technical questions related to this test, please call **CTGT** at **484-244-2900**.

For general inquiries, please call our Customer Care team at 877-402-4221.

UPDATED TEST

Anti Parietal Cell Antibody (APCA)

****TEMPORARILY DISCONTINUED TEST****

Description of Change Anti Parietal Cell Antibody (test code: APCA) temporarily discontinued due to supply chain issues. We are currently exploring other methodologies for alternative APCA in-house testing.

Effective Date **Immediately**

Test Name Anti Parietal Cell Antibody

Order Code **APCA**

Replacement Test APCA by ELISA can be ordered as an alternative method at this time. For this option, please order the test as ***"MISC: APCA by ELISA."***

For questions, please call **877-402-4221**.

For technical questions related to this test, please ask for **Technical Support** between the hours of **8 a.m. and 4:30 p.m.** For general inquiries, Customer Care is available to assist at any time.
