

Miscellaneous Microbiology Test Ordering Instructions for Outreach Clients

Effective Date:

December 5, 2022

Contact: Client Services
317.491.6000

Update Description:

The Miscellaneous Microbiology Laboratory Test Outreach orderable (**MiscMicro Test Outreach**) is used for tests found in the IU Health Laboratory Test Directory and are not yet built in the client's interface or when the IU Health Laboratory Services must temporarily send out a test to its Reference Laboratory.

The orderable has been built with six **Ask at Order Entry (AOE)** questions that need to be completed to ensure the ordered test is accurately processed. No additional order comments are necessary in each order.

Results will be transmitted back through the interface via an HL7 result message, with appropriate Order ID and accession number information, to be posted to the patient's order/chart.
