## Legacy Lab Alert

June 4<sup>th</sup>, 2021

An Important Update from Legacy Laboratory Services

### Citrated Light Blue Top Tubes

Due to a national backorder of the citrated light blue top tubes by both BD and Greiner for the 2.7mL and 1.8mL volumes. The following conservation measures have been implemented to conserve inventory to all Legacy Health Lab customers:

- Usage will be examined, and reduction of orders will be cut up to 50% of historical usage.
- This will be examined on a weekly basis and determined on our suppliers forecast.
  - Once the market has stabilized communications will be sent out and normal usage will be open.

We sincerely apologize for any inconvenience that this will cause. We will provide updates when the backorder has been lifted and we are able to resume our normal process again.

For additional information, please contact your account representative, client services or consult our website:
