

Who is this message for:

NewYork Presbyterian Hospital/Weill Cornell Medical Center Healthcare Providers and Clients

What is this message about:

Due to a vendor issue, test results for Calcium, Triglyceride, and Low Density Lipoprotein (LDL-calculated) testing performed at NewYork-Presbyterian Weill Cornell Medical Center, performed from 12/20/2022 –12/21/2022 may be inaccurate. We have resolved the accuracy issue for tests performed thereafter. However, due to specimen stability limits, we are unable re-run affected samples.

Why is this message important:

Out of an abundance of caution, we will add a comment to affected patient results.

What do we need from you?

We recommend submitting samples for repeat testing, which will be free of charge.

For any questions or concerns:

We understand the concerns and inconvenience this may cause and wish to express our apologies to all affected. If you have any questions, please feel free to contact us: Inpatient and Emergency Department inquiries (212) 746-2660, Outpatient and Outreach Client inquiries (212) 746-0670.
