

Supply Request update

Who is this message for:

NewYork-Presbyterian Hospital/Weill Cornell Medicine Healthcare providers and clients

What is this message about:

In February 2023, NewYork-Presbyterian announced a new agreement in which Quest Diagnostics will acquire some of the laboratory services of NYP. NYP will still operate its hospital laboratories to continue providing complex clinical laboratory services for our inpatient, emergency department, and presurgical / surgery outpatient populations, among others.

Effective immediately, NewYork-Presbyterian laboratories will no longer be able to fulfill all supply requests. We will now be servicing clients that need supplies for Anatomical Pathology and for selective carved-out testing only. Kindly be advised that supply requests will be reviewed upon fulfillment.

Why is this information important:

Supply fulfillment will be limited to Anatomical Pathology work and selective carved-out testing that can be processed at NYPHL.

What do we need from you?

No action is required at the moment. If additional supply is needed outside of Anatomical Pathology or the selective carved-out testing, please reach out to your Quest representative. A list of the carved-out testing can be found on the Infonet: <https://infonet.nyp.org/Lab/Pages/EpicExclusionsQuest.aspx>

For any questions, please contact:

if you have any questions, please contact our Logistics Department at (212)-746-0669 or Call Client Service at (212) 746-0670.
