MEDICAL NECESSITY STATEMENT FOR PHYSICIANS

The ordering physician certifies that the tests ordered and to be billed to Medicare are medically necessary and understands that all available tests may be ordered individually and, profiles may, where appropriate, be billed separately. Only tests that the ordering physician believes appropriate for patient care should be ordered. Medicare will pay only for tests that are medically necessary for the diagnosis and treatment of the patient, rather than for screening purposes. ICD-9CM diagnosis code(s) **must** be provided for each test ordered.

AMA Panels

REFLEX/CONFIRMATORY TESTING NOTICE

It is the policy of Providence Alaska Medical Center laboratory to perform reflex or confirmatory test automatically on microbiological cultures (gram stain, bacterial identification and susceptibility, if warranted, unless otherwise requested), negative Rapid Strep Screen (culture), positive HIV (Western Blot), positive Hepatitis B Surface Antigen test, positive, reactive RPRs (FTA-Abs), CSF or Body Fluid Cell Count, Lipid Panel Triglyceride >400mg/dL (direct measure LDL), and CSF Cell Count, Malaria smear, CBC/Blood Count (Pathologist review). CBC will be ordered if not completed within 24 hours of flow cytometry request. Many of these tests are also available without confirmation, if desired. Transfusion Medicine will perform additional testing as needed to identify auto- and allo-antibodies, and/or to provide compatible blood products for transfusion. The subsequent testing is performed at additional charge. Medical necessity must apply to the reflex test also. Refer to Providence Alaska Medical Center laboratory's Testing Manual for details.

BONE MARROW COLLECTION KIT: (can be sent to floor upon request. Call Microbiology (907) 212-3025)

- Culture: aerobic BTA bottle; 0.5 - 1.0 mL into bottle***
- Fungus cult: pediatric isolator tube; 0.5-1.0 mL***
- AFB: pediatric isolator tube or sterile tube; 0.5 mL*** or leave in syringe (not ideal).
- Brucella cult: pediatric isolator tube; 0.5-1.0 mL***

***Send 2 iodine dispensers with supplies.

***Clean tops of all tubes first with iodine and let dry 1 minute before inoculating.
