St. Joseph's/Candler Laboratory Services Fact Sheet

Community Outreach Mission

Providing treatment for disease and illness is only one facet of St. Joseph's/Candler's role in the community. Our outreach initiatives also provide a positive force in the overall health and well-being of the areas we serve.

We take a holistic approach to healing. We believe that external factors are essential to good health, including safe and adequate housing, education, access to information and meaningful employment.

Our mission of promoting wellness for all people incorporates this approach and can be seen in our numerous community outreach efforts.

Summary

Our full-service laboratories, constantly staffed by certified clinical laboratory scientists, provide comprehensive clinical laboratory testing to physicians, clinics, long-term care facilities, and hospitals. We serve clients in Chatham, Bryan, Liberty, Candler, Effingham and Bulloch counties in Georgia as well as Beaufort and Jasper counties in South Carolina. Through our state-of-the-art instrumentation and methodologies, our dedicated laboratory co-workers strive for uncompromising quality standards.

The St. Joseph's/Candler Health System Laboratories are clinical laboratories dedicated to providing the highest quality of services to our community, patients and providers. The SJ/C laboratories participate in the College of American Pathologists (CAP) Laboratory Accreditation Program, have Clinical Laboratory Improvement Amendments (CLIA) certification through the Center for Medical and Medicaid Services (CMS) and are accredited by the American Association of Blood Banks (AABB). The SJ/C laboratories are full-service labs offering diagnostic services, pathology services and outreach reference laboratory services.

Outpatient Lab Locations

To better serve our communities and patients, we offer convenient outpatient draw stations with walk-in services. Three stations are located in Savannah, one in Bluffton, and one in Pooler.
