CBC with Differential Change in Reporting

Effective Nov. 18, 2019 a differential will no longer routinely be reported when the WBC count is less than $0.6 \times 10^3/\text{mL}$. This includes percentage of cell types, absolute numbers, and cell morphology. If you feel a slide review is warranted clinically, please call the hematology laboratory (859-301-9247). Associated charges will be adjusted downward (hemogram only) when the differential is not performed.

Please contact Debbie Dunn, Hematology Manager at 859-301-6035 for further information.
