

Laboratory Testing Update

Date: February 7th, 2025

On February 12th, 2025, the following testing will be transitioned from the Abbott Architect immunoassay platform to the Roche Cobas e801 immunoassay platform:

Hepatitis A IgM Antibody

Hepatitis B Core Antibody

Hepatitis B Core IgM Antibody

Hepatitis B Surface Antibody

Hepatitis B Surface Antigen

Hepatitis C Antibody

HIV Antigen/Antibody

Current Methodology: Chemiluminescence

New Methodology: Electrochemiluminescence

All lab order numbers and panels will remain the same.

All results will continue to be reported qualitatively

If you have any questions please contact Amy Binion, Immunology Manager, at 859 301-2077.
