

## Laboratory Testing Update

On October 1st, 2025, Syphilis testing will be transitioned from the Abbott Architect immunoassay platform to the Roche Cobas e801 immunoassay platform:

**Current Methodology: Chemiluminescence**

**New Methodology: Electrochemiluminescence**

**The order number will remain the same and reactive specimens will continue to reflex to an RPR**

**Results will be reported as reactive or non-reactive**

**Results will not be reported with the cutoff index as it is currently**

If you have any questions please contact Amy Binion, Immunology Manager, at 859 301-2077.
