

St. Peter's Health Laboratory is a full-service CLIA accredited laboratory consisting of two major services: clinical laboratory and anatomic pathology. The laboratory is staffed with accredited pathologists, accredited and licensed medical laboratory scientists, medical laboratory technicians, phlebotomists, and support staff.

St. Peter's Health Laboratory offers a broad range of testing services including cytology, histology, clinical chemistry, hematology, microbiology, blood bank, serology, and molecular diagnostics. We provides laboratory services for both inpatients at St. Peter's Health as well as outpatients in Helena and surrounding areas.

Tests not performed at St. Peter's Health Laboratory are sent to reference laboratories that are both approved by St. Peter's Health Medical Staff and are CLIA accredited.
