

# PLANT A PATH TO A SUCCESSFUL BLOOD BANK SPECIMEN COLLECTION

## Notes to "leaf" an impression in your mind:

- ✿ Place the armband label around the top portion of the tube NOT on the lid (it is acceptable for the "H A R" portion to be covered up)
- ✿ Affix the patient test label (the one with the barcode) under the armband label
- ✿ Make sure your initials, date and time of collection are on each tube
