Laboratory Update

Temporary Change in Performing Lab for Lipoprotein A Testing

Dear Healthcare Provider,

Currently, Lipoprotein (a) testing is temporarily being sent to ARUP reference lab due to a sudden reagent shortage from the manufacturer. The EPIC Lab order number (LAB7142) will remain the same. Preferred Lab Partners is currently validating the new formulation of Lipoprotein (a) reagent that will measure in molar units and once that is complete the testing will be brought back in-house. We apologize for the inconvenience.

If you have any questions, please contact Betsy Pelzel, Chemistry Technical Specialist, at (513) 865-1756.
